

Automated Trash Collection with 96-Gallon Cart

Dear City of Demopolis resident,

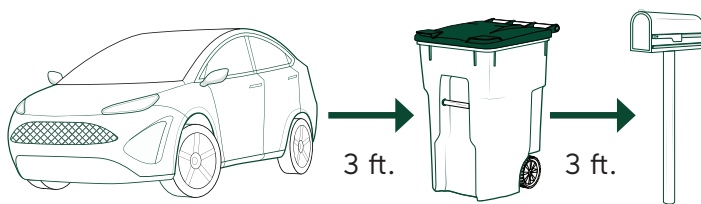

WM is proud to be your service provider. Beginning immediately, we are transitioning to automated collection trucks to pick up trash.

Automated collection with a standardized 96-gallon cart is cleaner for your community and the environment, more efficient, and safer for residents and drivers.

With automated collection, no household garbage outside the cart will be collected. Resident-owned containers cannot be serviced.

Trash will continue to be picked up twice weekly on your regular collection day. Use only the WM provided 96-gallon cart for trash. No other containers can be serviced.

All material must fit inside the cart with the lid firmly closed - no material outside the cart will be collected.

Proper cart placement ensures the truck's automatic arms can lift and empty the carts. Cart must be placed less than 3 feet from the curb or public road and at least 3 feet away from any obstacles (trees, cars, mailboxes, etc.) to allow unrestricted access to the cart for servicing. Place the wheels of the cart toward the house.

Please have your carts at the curb by 6 a.m. or the night before your collection day.

Need an extra 96-gallon trash can?

Please contact DWWSB at (334) 289-3328 to order your additional trash cart. Additional fee applies.
